

## Ventilation hose PE-EL

For high chemical resistance

The ventilation hose is suitable for aggressive solids such as dust, powder and fibers as well as for aggressive gaseous media, such as vapors and smoke. It is also suitable for areas liable to contain combustible dust.

The hose is equipped with a ground cable in each end of the helix

Good resistance to mineral oil, alkalis, acids and most of other types of chemicals

Highly flexible

Electrical properties and surface resistance; <10k Ω.

Conforms to the requirements of the European ATEX directive

品名	Ventilation hose PE-EL
材料	Electrically conductive Polyethylene
环境温度范围	- 35 ° C to +80 ° C
直径 (mm)	160
重量 (公斤)
