

## Liquid collector 014A

## Well suited for extraction of liquids

Handy ejector-driven drum filler for collection and transport of oil, chemicals, water and other liquids. It is placed in a bung-hole (R 2") of an empty but suitable oil drum. By connecting the unit to a compressed air hose and a suction hose, it is ready for use. Suction stops when the drum is full, due to the built-in float stop. The ejector is easy to mount on a variarity of drums. Drum is not included.

- Simple and robust ejector
- No filter is needed
- Drum is not included
- Easy handling
