

## Nederman Fluid Management system (Safe record)

Liquid and oil monitoring system for improved profit and service for Vehicle Repair Shops.

The NMS lubrication monitoring system for complete fluid control accurately monitors and supplies the correct amount of oils and liquids to each vehicle without manual handling or tapping. It also informs suppliers when it is time to refill tanks. This is the end of spillage, loss and unnecessary stoppages.

- Up to 250 delivery points
- Complete liquid control
