

Hoog vacuüm leidingsysteem accessoires

Kanalen gebruikt voor toepassingen met een hoog vacuüm.

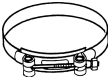

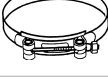

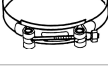

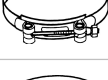

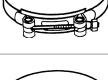

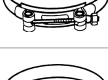

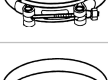

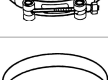

Leidingsystemen van Nederman met een hoog vacuüm zijn uitgevoerd om zware druk van hoge luchtstromen nodig voor hoog vacuüm systemen te weerstaan. We hebben kanaalstukken om elke configuratie te bouwen die nodig is voor uw installatie. De bochten (ellebogen) zijn beschikbaar met versterking voor zwarte materialen die door het kanaalsysteem gaan.
