

GA8 pre-separator

Small and light-weight pre-separator

In a central cleaning system it is good to protect the pipe system and the filter from screws, nuts and bolts and other coarse and heavy parts that might be extracted in the process.

The GA8 is a small, lightweight pre separator that capture the coarse and heavy parts before they enter the pipe system. One GA8 should serve one suction point

- Small and light-weight
- Protects the pipe system
- Easy to install
- Rubber carpet for long lifetime
- Can easily be fitted to existing cleaning systems
