

PRODUCT LEAFLET

Balance Arm

Ergonomic, space saving and full suction to hard-to-reach areas

Balance Arm

- ✓ Economic and safe
- ✓ Well balanced and flexible
- ✓ Easy to operate
- ✓ Universal

In order to gain maximum accessibility, the balance extraction arm is built up with two gas damper balanced sections. The extractor has three swivel points, one at the base, one at the middle and one at the point where the nozzle is attached. The nozzle can therefore be moved to any chosen position within the reach of the balance arm. The arms can be equipped with all suction nozzles within the Nederman High Vacuum programme. The friction for sideways movement is adjustable. The balance arm can be mounted in three different ways: to a wall, to a work bench or to an extension arm.

Mounting bracket, nozzle (CWN-S or FWN), handle and hose (FS or WH hose) must be ordered separately. Mounting bracket, nozzle, handle and hose are ordered separately.

Balance Arm
